"Kamuda Dijital Dönü■üm" ("Digital Transformation In Public Sector") Book Is Published

Atilla Ayd■n, our consultant on digital transformation, contributed to the book **"Digital Transformation in Public Sector"**. The book is one of the most up-to-date sources in Turkish about the government's digital transformation. Our consultant has made a contribution by co-writing the sections **"Digital transformation in government in selected countries, success factors and current trends"** and **"Digital government in the presence of international organizations"**. The book is published under the editorship of Prof. Gonca Telli Yamamoto.

"The book's aim is to understand **digital transformation approaches** in the public sector in Turkey and in the world, to compare Turkey's current position with other countries' applications, to have an idea about the best practices, and to record digital transformation works oriented to the public sector. The latest developments in the information and communication technologies affect our country as well as the world. Digitalization comprehends the public sector in terms of obtaining, storing, processing and transmitting information."
